Question:
Title: Music Streaming Management System

You are tasked with developing a **menu-driven console-based application** that manages **Artists**, **Albums**, and **Tracks**, and allows a user to interact with the system via a menu-driven interface.

Requirements:
Your system must support the following **menu-driven operations**:

1. Add a new artist
2. Add a new album
3. Artist adds a track for the album
4. Display all artists
5. Display all albums
6. View all tracks for a given artist
7. Display all tracks
8. View all tracks for a given album

Class Design:
1. Artist *(artist_id, name)*
2. Album *(album_id, title)*
3. Track *(track_id, title, album_id, artist_id)*
